

## Aim of Quizzes

The Quizzes test basic statistical skills.

Quiz	Content	Complete in Tute
Quiz1 5%	Part 1: Exploratory Data Analysis	Week5
Quiz2 5%	Part2: Probability and Distribution Theory	Week9
Quiz3 5%	Part3: Hypothesis Testing and Inference (excluding Topic12)	Week13

## Quiz Instructions

- Quizzes are completed in the first 20 minutes of your designated tutorial class.
- Please bring your student card.
- Each Quiz consist of 5 short questions requiring a numerical answer.
- If the answer requires rounding, use up to 2dp.
- Use both hand working and R to doublecheck your calculations.
- You may use a calculator and refer to the MATH1005 website but not have any hard copies of notes.
- To prepare, work through the practise questions and revise the relevant lectures and tutes.
- The better mark principle automatically applies to the Quizzes.
